

Amore a prima vista!

# EMOTION

Emoziona al primo sguardo e seduce al primo tocco. E' arte materica allo stato puro dove innovazione e design si fondono per creare una porta d'ingresso esclusiva, unica ed inconfondibile. Emotion è la protagonista di ogni ambiente.

# SINTESI TECNICA

**CE - Cornice lato esterno** realizzata in alluminio estruso dello stesso colore del pannello. Su richiesta, anche di colore diverso, compresa la finitura effetto inox. Per le finiture effetto legno, vedi limitazioni alla pagina successiva.

**CI - Cornice lato interno** stesse caratteristiche e possibilità di personalizzazione della cornice sul lato esterno, può essere smontata e rimontata facilmente per l'installazione e la sostituzione del vetro.

**K - Lavorazione decorativa** di circa 2 millimetri di profondità, ricavata sulla lastra di alluminio.

**I - Lato interno liscio** realizzato di serie dello stesso colore del lato esterno. Su richiesta, colori diversi e varianti decorative come indicate sotto.

**N - Nucleo** costituito da un mix di materiali particolarmente performanti, disposti in più strati, con ottime proprietà di isolamento termico ed abbattimento acustico. Materiali e prestazioni variano in base alla tipologia e allo spessore del pannello.

**V - Vetro isolante** fornito su richiesta, realizzato con doppio o triplo vetro in base allo spessore del pannello. In entrambe le soluzioni, il vetro esterno è stratificato e quello interno temprato, in conformità alle vigenti norme sulla sicurezza. Per consentire il fissaggio della cornice interna, lo spessore del vetro deve essere inferiore di almeno 4 mm rispetto a quello del pannello.

**X - Lavorazione decorativa** di circa 2 millimetri di profondità, ricavata sulla lastra di alluminio, nella quale è incastonato l'inserto in acciaio inox AISI 316L satinato montato a filo del pannello. Su richiesta, inserto nei colori della serie Lac ed Exclusive.

**LATO

**Light**

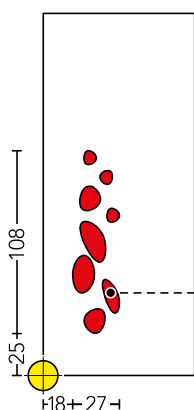

Lavorazione **K\***

**Double**

Uguale al lato esterno

\* La lavorazione **K** riproduce sempre lo stesso disegno del modello esterno. Per i modelli senza inserti sul lato esterno, le varianti Light e Double coincidono.

## DISEGNI E SIMBOLI

I disegni dei pannelli sono proporzionati alle dimensioni di cm 90 x 215 per l'anta principale e cm 45 x 215 per la mezza anta. Le quote indicate nei disegni (esprese in centimetri) indicano l'ingombro dell'area decorativa del modello. Con il termine area decorativa, si intende la parte lavorata del pannello che ne caratterizza il modello. L'area decorativa ha misure fisse e la sua posizione, rispetto al perimetro del pannello, può essere centrata o vincolata ad uno o più lati, quindi ad un angolo. I punti di vincolo sono indicati nei disegni con questo simbolo  (vedi figure in basso).

**Inserti.** I modelli con gli inserti sono indicati nei rispettivi disegni con la parte evidenziata in rosso.

## DIMENSIONI E SPESSORI

I pannelli sono disponibili nelle dimensioni e negli spessori indicati nell'apposito capitolo tecnico. Nella scelta del modello, valutare che l'ingombro dell'area decorativa non interferisca con il profilo perimetrale in cui è alloggiato il pannello. Il margine consigliato per garantire un buon risultato estetico, è di almeno un centimetro lungo tutto il perimetro del pannello, al netto della presa dello stesso all'interno del profilo.

**Taglio a misura.** Il taglio a misura del pannello viene eseguito su richiesta, rispettando i vincoli dell'area decorativa del modello come sopra descritti ed indicati nelle figure in basso. Per esigenze particolari, ma nei limiti consentiti dall'area decorativa e dalle dimensioni richieste, il taglio a misura può essere effettuato decentrato. L'eventuale fattibilità va richiesta tramite l'invio di un disegno quotato del modello.

## LIMITAZIONI

**Verso delle venature.** Tutti i colori effetto legno, avranno le venature disposte in senso verticale rispetto al pannello.

**Pannelli nei colori legno fuori cartella.** Saranno realizzati su richiesta presso impianti esterni. Per esigenze produttive, i pannelli con queste finiture avranno dei fori lungo i bordi verticali che ne riducono la misura utile in larghezza di circa 4 cm.

**Cornici vetro nei colori legno.** I modelli a vetri di questa collezione, realizzati nei colori effetto legno della serie Skin e Effect (compresi i rispettivi fuori cartella), saranno realizzati di serie con le cornici di forma classica (foto a fianco).
