SINTESI TECNICA

H - **Lavorazione decorativa** di mm 13 x 2 di profondità, ricavata sulla lastra di alluminio.

K - **Lavorazione decorativa** di mm 30 x 4 di profondità, ricavata sulla lastra di alluminio.

I - **Lato interno liscio**, realizzato di serie dello stesso colore del lato esterno. Su richiesta, colori diversi e variante decorativa come indicata sotto.

N - **Nucleo** costituito da un mix di materiali particolarmente performanti, disposti in più strati, con ottime proprietà di isolamento termico ed abbattimento acustico. Materiali e prestazioni variano in base alla tipologia e allo spessore del pannello.

DISEGNI E SIMBOLI

I disegni dei pannelli sono proporzionati alle dimensioni di cm 90 x 215 per l'anta principale e cm 45 x 215 per la mezza anta. Le quote indicate nei disegni (esprese in centimetri) indicano l'ingombro dell'area decorativa del modello. Con il termine area decorativa, si intende la parte lavorata del pannello che ne caratterizza il modello. L'area decorativa ha misure fisse e la sua posizione, rispetto al perimetro del pannello è sempre centrata (vedi figura in basso).

DIMENSIONI E SPESSORI

I pannelli sono disponibili nelle dimensioni e negli spessori indicati nell'apposito capitolo tecnico. Nella scelta del modello, valutare che l'ingombro dell'area decorativa non interferisca con il profilo perimetrale in cui è alloggiato il pannello. Il margine consigliato per garantire un buon risultato estetico, è di almeno un centimetro lungo tutto il perimetro del pannello, al netto della presa dello stesso all'interno del profilo.

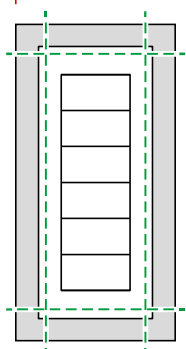

Taglio a misura. Il taglio a misura viene eseguito su richiesta, con l'area decorativa del modello centrata rispetto al perimetro del pannello (vedi figura in basso). Per esigenze particolari, ma nei limiti consentiti dall'area decorativa e dalle dimensioni richieste, il taglio a misura può essere effettuato decentrato. L'eventuale fattibilità va richiesta tramite l'invio di un disegno quotato del modello.

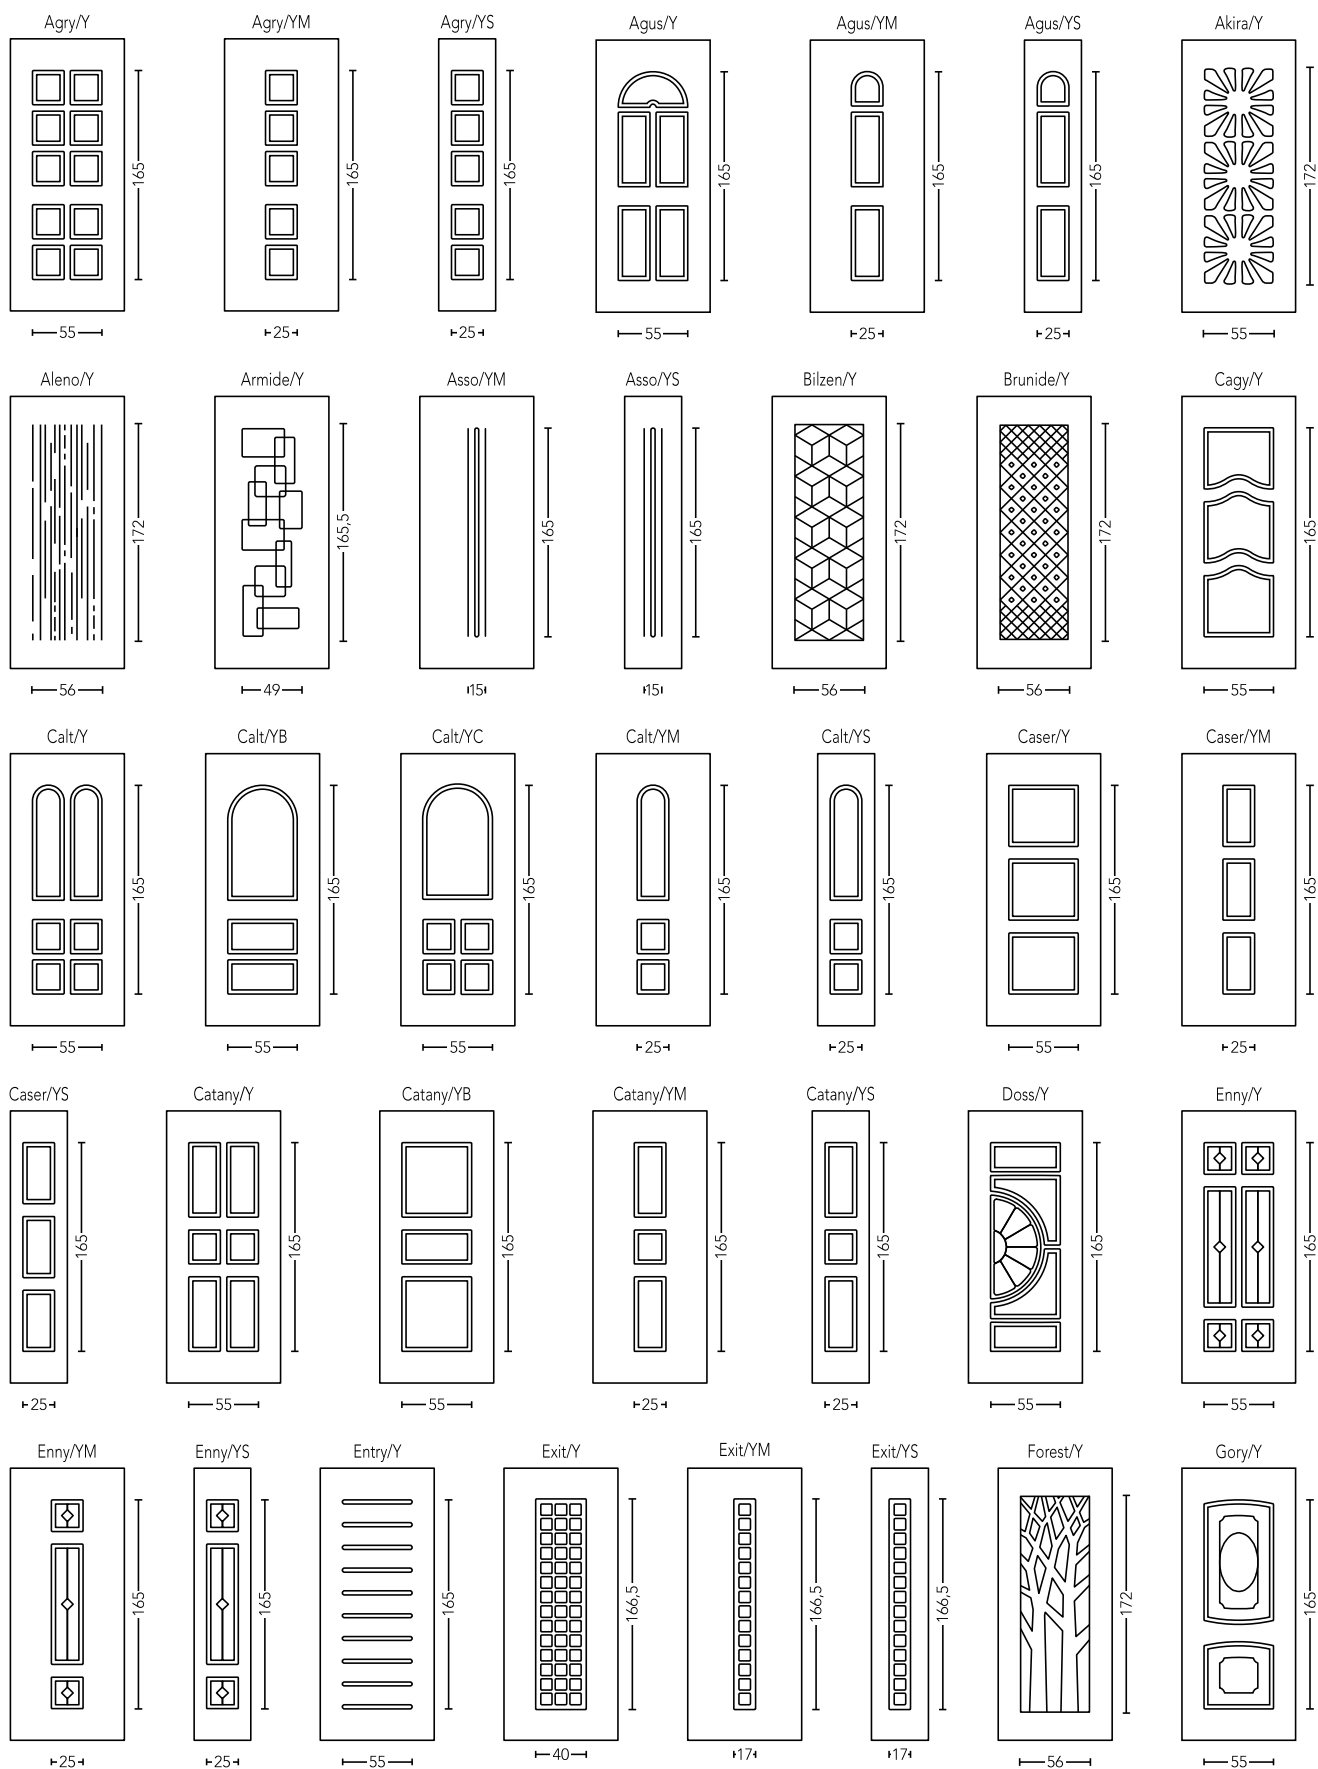

LIMITAZIONI

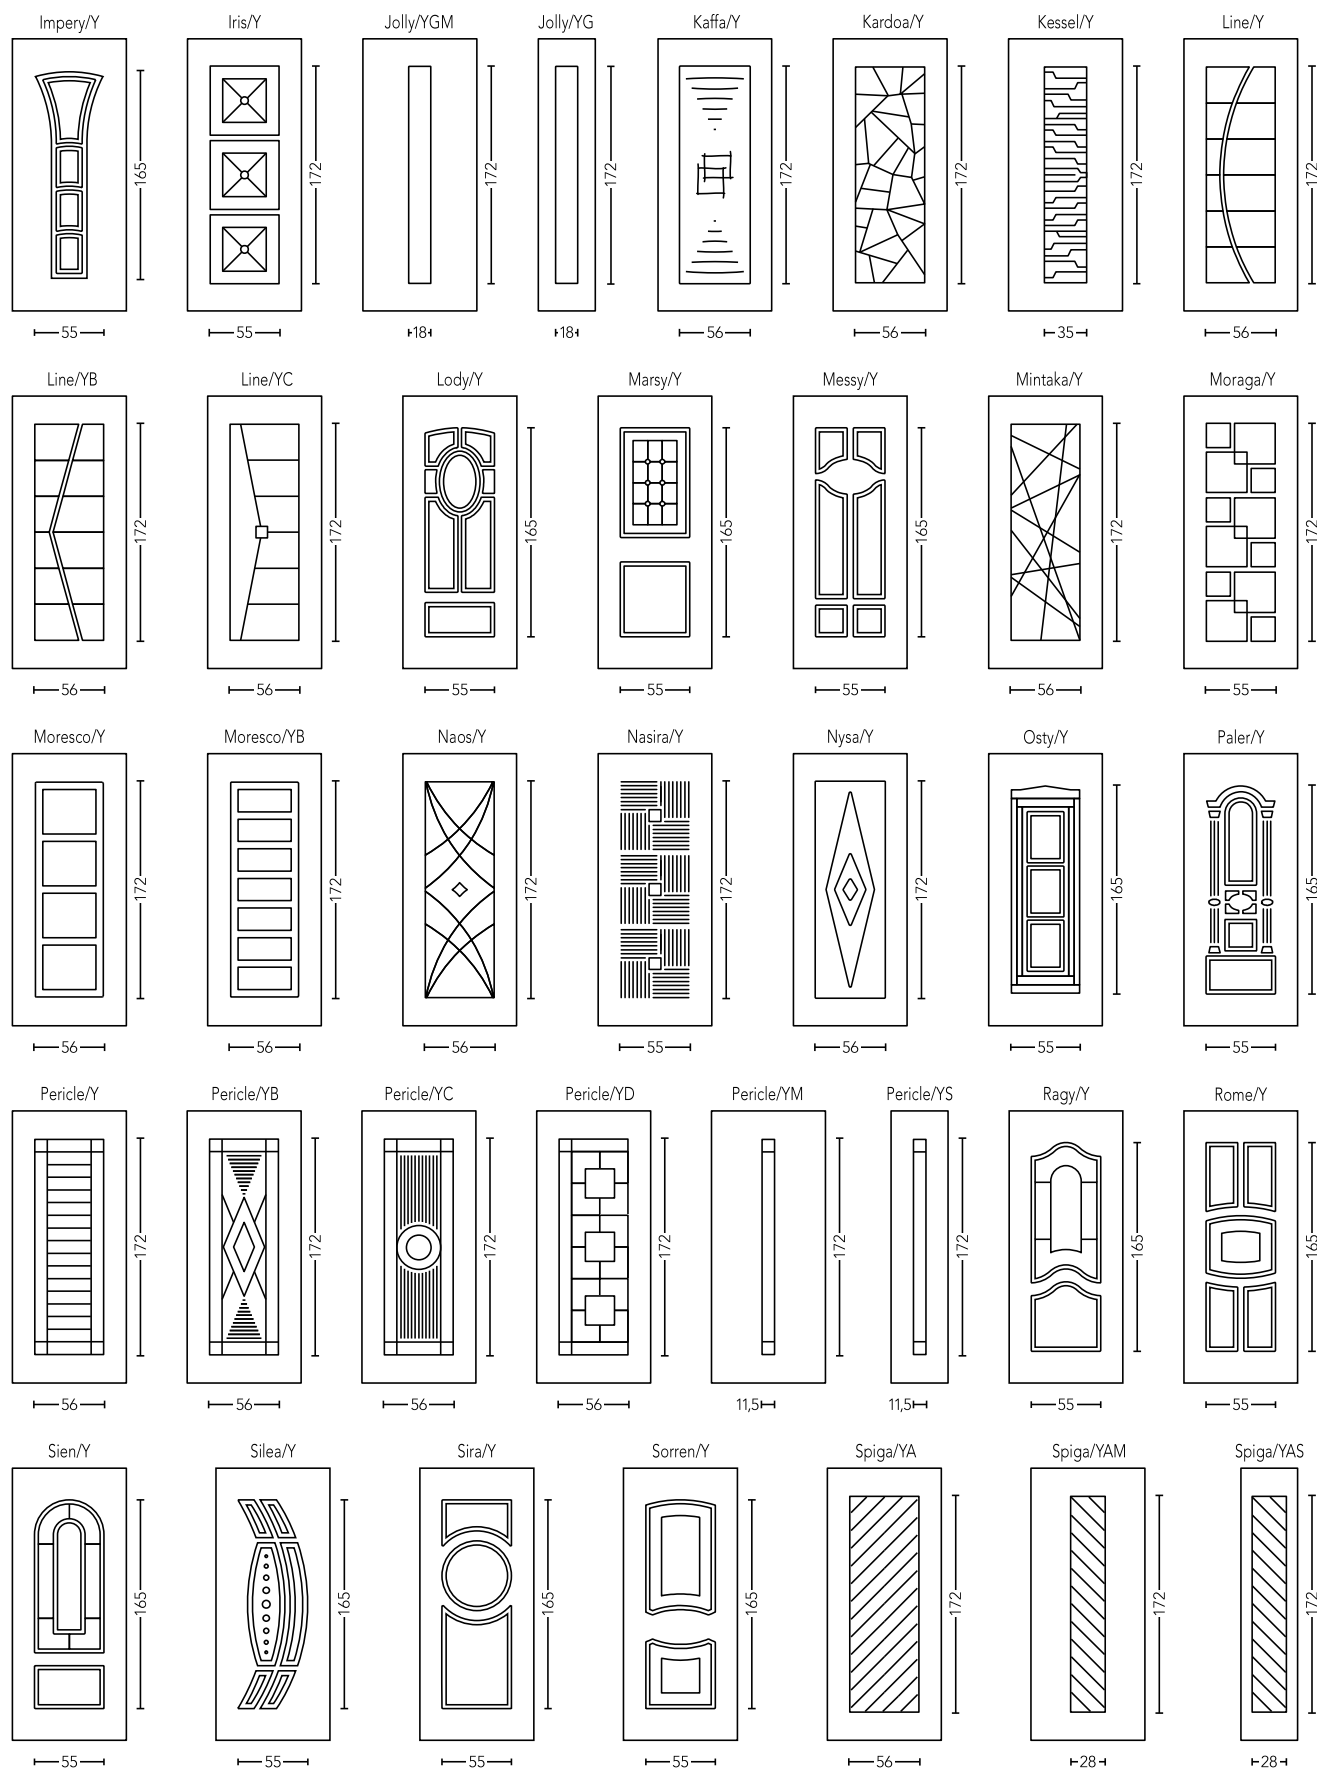

Verso delle venature. Tutti i colori effetto legno, avranno le venature disposte in senso verticale rispetto al pannello.

Pannelli nei colori legno fuori cartella. Saranno realizzati su richiesta presso impianti esterni. Per esigenze produttive, i pannelli con queste finiture avranno dei fori lungo i bordi verticali che ne riducono la misura utile in larghezza di circa 4 cm.
